CRYO 360 FAT FREEZING

Cryo fat freezing, also known as cryolipolysis, is a non-invasive cosmetic procedure used to reduce fat deposits in certain areas of the body. The device delivers controlled cooling to the targeted area, which crystallizes the fat cells underneath the skin.

Over time, the body naturally eliminates these damaged fat cells through its lymphatic system, resulting in a reduction of fat in the treated area.

Cryolipolysis is popular because it's non-surgical, non-invasive, and requires minimal downtime. It's an effective option for reducing localized pockets of fat that are resistant to diet and exercise.

1 BODY PART - 2 APPLICATORS

APPLICATOR ONLY

1 SESSIONS (30 MIN)..... R 1500
6 SESSIONS (30 MIN P/SESSION)..... R 7200

1 SESSION (60 MIN) R 3000
6 SESSIONS (60 MIN P/SESSION)..... R 16 200

CAVITATION & RADIO FREQUENCY

Radiofrequency and cavitation treatments are advanced skincare procedures that use safe and gentle technology to address common concerns like cellulite, stubborn fat pockets, and loose or sagging skin.

Radiofrequency works by delivering energy waves deep into the skin, stimulating collagen production and tightening the skin from within. It helps to reduce wrinkles, fine lines, and sagging, resulting in a more youthful appearance.

Cavitation, on the other hand, uses ultrasound technology to target stubborn fat cells, breaking them down into smaller particles that the body can naturally eliminate. This can help to sculpt and contour areas of the body where fat tends to accumulate, like the abdomen, thighs, and arms.

Both treatments are non-invasive and require no downtime, making them a convenient and effective option for achieving smoother, firmer skin and a more toned physique.

BODY TREATMENT INCLUDES RF VACUUM 10MINS,
CAVITATION 20 MINS, RADIO FREQUENCY 15 MINS

1 SESSION (60 MIN)	R 550
PACKAGE OF 6 SESSIONS	R 3120
PACKAGE OF 8 SESSIONS	R 4000

RF FACIAL FOR TIGHTENING, FINE LINES AND WRINKLES

INCLUDES 10 MIN LED COLOUR THERAPY

1 SESSION (30 MIN)	R 650
PACKAGE OF 6 SESSIONS	R 3600

RF MICRO NEEDLING

This treatment is combination of microneedling and radiofrequency energy to enhance skin rejuvenation. Microneedling creates controlled micro-injuries in the skin, stimulating collagen production, while radiofrequency energy further boosts collagen and elastin synthesis. This dual action improves skin texture, tightens pores, reduces wrinkles, and addresses acne scars. RF microneedling is performed using a specialized device that delivers both microneedles and RF energy into the skin's deeper layers.

FULL FACE (60 MIN)	R 1650
FACE & NECK (90 MIN)	R 2700
FACE, NECK & DECOLLETAGE (120 MIN)	R 3500

DIODE LIPO LASER

During the lipo laser treatment, specialized applicators are applied externally to the targeted area of the body where excess fat is present. The laser emits low-level energy at a specific wavelength, which penetrates through the skin without causing damage.

The laser energy is absorbed by the fat cells beneath the skin, causing them to release their contents. This process, known as lipolysis, breaks down the fat cells into smaller particles, which are then metabolized and naturally eliminated by the body over time.

In addition to fat reduction, the laser energy can also stimulate collagen production in the skin. This helps to improve skin elasticity and firmness, resulting in a smoother and more toned appearance in the treated area.

ONE BODY PART

1 SESSION (30 MIN)	R 650
PACKAGE OF 6 SESSIONS	R 3500

FAR INFRARED SAUNA DOME

A FAR infrared sauna uses FAR infrared light to heat the body directly. This type of sauna penetrates deeper into the skin, generating heat that promotes sweating and detoxification. Benefits of FAR infrared sauna sessions include improved circulation, relaxation of muscles, pain relief, detoxification through sweating, and can burn up to 600 calories per 30min session.

1 SESSION (30 MIN)	R 400
PACKAGE OF 6 SESSIONS	R 2280
PACKAGE OF 8 SESSIONS	R 2880

RF EMS SCULPT

RF EMS is a toning treatment that uses radiofrequency energy and electrical muscle stimulation to tighten skin and tone muscles. By heating the skin's deeper layers, it boosts collagen production for tighter skin, while electrical stimulation strengthens muscles, improving definition. This dual-action approach enhances overall skin texture, reduces wrinkles, and sculpts the body. Using specialized devices, controlled energy is delivered to the treatment area for a toned and rejuvenated appearance.

1 BODY PART / 2 PADDLES

1 SESSION (30 MIN)	R 1000
PACKAGE OF 6 SESSIONS	R 5000
ADDITIONAL BODY PART PER SESSION / 2	
SMALL PADDLES	R 600
RF EMS SCULPT PELVIC PLATE	R 1000

HIFU

(HIGH INTENSITY FOCUSED ULTRASOUND)

HIFU is a non-invasive procedure used for skin tightening and lifting. It utilizes focused ultrasound energy to target specific layers of the skin, stimulating collagen production and promoting tissue tightening. This results in firmer, lifted skin and a reduction in wrinkles and fine lines. HIFU treatments are often used to address sagging skin on the face, neck, and décolletage, offering a non-surgical alternative to facelifts with minimal downtime.
